VERTTM

STOCK SYSTEM

CONTINUOUS CHEEKREST | LIGHTWEIGHT DESIGN (19.5 OZ) | STANDARD BCG COMPATIBLE

WWW.BATTLEARMSDEVELOPMENT.COM

A VERT™ Stock System

- Lightweight engineering. Only 19.5 oz!
- 30%-40% lighter than traditional PDW stock systems
- Compatible with most AR-15 style lower receivers
- Simple "bolt-on" installation
- No end-plate or castle nut required

B S7 Tool Steel Guide Rods

- High impact resistant
- Slim .315" dia. (vs. .375") rods for extra clearance with ambi. safety
- Offset rightside guide rod compatible with integral ambi. bolt release lower receivers

C Compact Buffer Tube

- Ultimate compact size for concealment
- Buffer tube wrench included

D Continuous Cheekrest

- Interchangeable cheek rest
- Sleek carbon fiber style kydex

E 7075-T6 Alum. Buttstock

- Robust engineering
- Ergonomically designed for comfort
- Built-in, limited rotation OD point
- (4) stock locking positions
- Fully Collapsed: 4.75"
- Fully Extended: 8.75" (measured from rear of receiver)

F Patent Pending Ultra Compact Buffer (3.9 oz)

- M16 bolt carrier compatible
- Dual recoil spring system
- Improved recoil management
- No proprietary BCG required

G Patent Pending Locking Mechanism

- Bi-directional locking capability
- Hardened S7 tool steel locking latch
- Smooth ball bearing locking detent
- Minimally invasive locking dimples on guide rods to maximize rod strength

H Internal Guide Bushings

- No metal to metal contact
- Ultra smooth operation
- Precision fit with minimal play
- Built-in limited rotation OD
- 175 F° max temp. for Cerakote
